

Asbestos Statement
Town of Herndon – Building Inspections

777 Lynn Street 2nd Floor, Herndon, VA 20170
Telephone (703) 435-6850 Fax (703) 318-8492
E-Mail: buildinginspections@herndon-va.gov

According to Section 36-99.7 of the Code of Virginia no building permit shall be issued allowing a building for which the initial building permit was issued before January 1, 1985, to be renovated or demolished until the building department receives certification from the owner or his agent that the affected portions of the building have been inspected for the presence of asbestos by an individual licensed to perform such inspections pursuant to section 54.1 – 50.3 and that no asbestos containing material were found or that appropriate response action will be under taken in accordance with the requirements of the Clean Air Act National Emission Standards for the Hazardous Air Pollutant (NESEAPS) (40 CFR.61, Subpart M) and the asbestos worker protection requirements established by the US occupational Safety and Health Administration for construction workers (29 CFR 1926.1101).

To meet this requirement fill out the following information:

Owner(s)_____

Address_____

As owner, or agent of the above building I certify that: The above building is a single family dwelling, or is a residential housing building containing four or fewer units, and is exempt from asbestos inspection requirements (Note: this exemption does not apply if the proposed renovation or demolition is for commercial or public development purposes); or

The combined amount of regulated asbestos-containing materials involved in the renovation or demolition is less than 260 linear feet on pipes, or less than 460 square feet on other facility components, or less than 35 cubic feet off facility components where length or area could not be measured previously, and is exempt from asbestos inspection requirements.

If neither box above has been checked, and if the application is for repair or replacement of roofing, floor covering, or siding materials and the use is not a school; asbestos inspection may be satisfied by checking one of the two following boxes:

The materials to be repaired or replaced are assumed to contain asbestos and that appropriate response actions will be accomplished by a licensed asbestos contractor or a licensed RFS contractor; or

An inspection of the materials to be removed or replaced was accomplished by an RFS inspector and an analysis of the sample showed no asbestos to be present.

If none of the four boxes above have been checked, one of the remaining two must be checked in order to complete this form.

The affected area of the above building to be renovated or demolished has been inspected for the presence of asbestos by an individual licensed to perform such inspection and that no asbestos-containing materials were found; or

Asbestos-containing materials in the affected area of the building to be renovated or demolished will be subject to appropriate response actions in accordance with all applicable laws relating to asbestos abatement including permits.
